

Let us explain our Wedding Package...

Why only this one package?

This package offers everything you need to cover your entire wedding day and allows you to print on your own - thereby avoiding the astronomical printing rates that many photographers charge. In the past we offered a variety of packages, but as this was always the most popular, most valuable and the one that provided for the happiest clients... we decided to simplify things and make it our only package! For those who want anything additional, we do offer a wide selection of services on our a la carte menu.

Why does FACE Photography select the top 400-600+ photos?

Most photographers will give you hundreds of unedited, proof-like photos on a cd or online, and leave you with the impossible and tedious task of sorting through them and coming up with the ones you'd like to print. Most photos are multiples of the same frame and many of them are either unflattering or unprofessional in one way or another.

FACE Photography eliminates the entire "proofing" process and makes your life a lot easier! We select the top 400-600+ photos (which has proved to be MORE than enough) and we edit each and every photo so that they are all ready to be printed!

What does "high resolution, edited and ready to print mean"?

This means that your 400-600+ photos come fully edited with respect to contrast, brightness, colour, sharpening and cropping. They are in high resolution so that you can print them in any size that you like!

Why do we offer all photos in colour, custom b&w and modern vintage?

Since you'll be printing your photos on your own, we figure that it's nice to see how your photos look in the 3 different formats. You get to see the photos side by side and easily decide whether they look better in colour, custom b&w or modern vintage. Please note that we use a custom b&w as well as a custom modern vintage... far more beautiful than the boring standard tones!

Why 12 hours of wedding coverage and unlimited locations?

12 hours will cover your entire day from hair & makeup to the cutting of the cake! It's a long day, but a special day, so we want to make sure we document every step of it! We go anywhere you want us to go; to the grooms place, the bride's place, the ceremony, the formal photo location(s), and finally the reception! The locations are unlimited!

Why 2 photographers?

You need 2 photographers for many reasons and don't allow anyone to convince you otherwise! We feel that the benefit of two photographers is a non-arguable issue for a few reasons: For some formal photographs (the few during the day that are actually posed) one photographer takes the shots while the other directs, fixes-up and perfects the poses of the subjects. For the remainder of the day, we capture candid shots from two angles and if one photographer misses a shot, chances are, the other one got it! There should be no compromising when it comes to this decision as one photographer just can't capture it all.

Why the professional DVD slideshow?

When you see one, you'll understand and then you'll "have to have one"! It documents your whole day, it's professionally done and it's beautiful! Copy it and send it to your friends and family... they'll love it! (Yes, we do provide our clients with written permission to copy and print all their photos and slideshow.)

Why the Engagement Shoot?

We feel that the engagement shoot is important for many reasons: A) it's a great way to start building a comfortable client-photographer relationship, B) It gives the clients an opportunity to practice being in front of the camera and learning some key tricks before the wedding day, and C) clients can use the engagement photographs for wedding related needs!

Any hidden costs or surprises?

No hidden costs.... but we do give you a little more than what's mentioned in the package details...

We like to surprise our clients by giving them artistically edited photos in addition to the standard edits mentioned above! We pick the top 100-120 (from the 400-600+) photos that best represent your day, we further edit them up as we see fit and use them for your slideshow. This means that some photos are airbrushed, popped with colour, vignettted, softened or spiced up with a little "FACE" flare. In addition to having these photos in your slideshow, we'll provide them to you in high resolution jpeg format so that you can print them as well if you like!

Perhaps revealing all of that just ruined the "surprise" factor... Oh well.... SURPRISE!
